PLAYGROUND

Our playgrounds require that users are in very good physical condition, with good motor skills. The sun may cause the ground surface and the slides to heat up. Shoes must be worn on all playgrounds, with the exception of the water playgrounds.

SHOWS

Our shows offer a broad programme of events, some of which feature loud music, sound effects, lighting/strobe effects, lasers, fog, pyrotechnics, or water effects. All shows can be accessed in a wheelchair.

LEGO® ARENA

Partially covered over, special spaces are reserved for wheelchair users.

MONKEY STAGE

Completely covered over, special spaces are reserved for wheelchair users. Please talk to our staff.

GOOD TO KNOW

- We have a First Aid Station available if necessary (number 56 on the park map).
- Wheelchairs are available in limited numbers at the Express Pass desk (number 8 on the park map).
- All family toilets are handicapped accessible.
- Dogs are not permitted in the park (with the exception of trained guide dogs/assistance dogs). These are permitted within the park, but not in the attractions. For all other dogs, our Doghouse* is available in Car Park P3. Simply report to the entrance (Checkouts 1 – 4): there you will receive all information, a key card and a lock**.

*Subject to charge

**Deposit payment required

NOTE

For legal reasons, we hereby inform you that the use of the attractions is at your own risk. LEGOLAND® accepts no liability on the basis of this brochure. ORIENTATION GUIDE

www.LEGOLAND.de/en

WELCOME TO THE LEGOLAND® DEUTSCHLAND RESORT!

We consider the safety of all guests and employees to be our top priority. Participation in an attraction is subject to certain conditions, which must be adhered to by all guests.

These minimum requirements can be found on the „LET'S HAVE FUN AND BE SAFE“ information signs directly at the entrances to the individual attractions.

Please pay particular attention to the height restrictions. Observe the ride before you decide to give it a try yourself. It must be apparent to staff that each guest is participating willingly. The staff

at site will decide whether or not you can take part. If it appears that an attraction is not suitable for you, staff are entitled to deny you access to avoid exposing you to danger. This is entirely for your own safety. The staff will also decide whether an accompanying person is also required for you to participate. This person is responsible for ensuring that the accompanied person adheres to the regulations. The accompanying person must be at least 18 years old.

HERE ARE THE MOST IMPORTANT MINIMUM REQUIREMENTS:

The attraction must be used and promptly left independently or with the help of an accompanying adult.

Regardless of their build or any physical limitations (e.g. amputation or prosthesis), the passenger must be capable of holding on during the ride and sitting independently and in an upright position. All persons must be securely seated, held in place by the bars.

There may be acoustic signals or safety instructions/announcements.

All guests must fulfil the minimum requirements of the respective attraction, which are prescribed by the manufacturer of the attraction and by the Technical Control Board (Technischen Überwachungsverein, TÜV).

RULES OF CONDUCT

RESPONSIBILITY

All participation in an attraction can involve risks. For their own safety, all guests must behave in a responsible manner and must follow the safety regulations. The instructions of the staff must be followed.

GETTING ON AND OFF

The majority of the attractions require that you get on and off quickly. You must do so either independently or with the help of an accompanying adult. Most attractions are accessible to wheelchair-users. However, wheelchairs, walking aids or other bulky objects cannot be taken with you on the ride. Further instructions are contained in the overview of the individual attractions overleaf.

TECHNICAL SHUTDOWNS AND EVACUATIONS

In the event of faults, you may have to wait in a gondola/vehicle for an extended period. In this case, please remain seated and follow the instructions issued by staff. You may potentially have to exit the attraction quickly, using steps, ladders, or narrow/long pathways. You must do so either independently or with the help of an accompanying adult. Further instructions are contained in the overview of the individual attractions overleaf.

ACCESS TO THE ATTRACTIONS FOR PERSONS WITH RESTRICTED MOBILITY

LEGOLAND® Deutschland offers a Take Care Bracelet for severely disabled or mentally handicapped guests. This is intended to make it easier for persons with severe disabilities to gain access to our attractions, and to shorten potential waiting times.

A pre-requisite to being issued the Take Care Bracelet is a disability ID card with the H, aG or G classification, in combination with the B classification. In addition, each person with a physical or mental handicap must be accompanied by a responsible person (at least 18 years of age). This person is responsible for ensuring that the disabled person can quickly board and exit the respective attraction. This also includes entering and exiting of a gondola/vehicle, and quickly leaving the attraction in an emergency. The accompanying person is also responsible for ensuring the safe conduct of the ride of the disabled person.

Take Care Bracelets for persons with disabilities and their responsible accompanying persons are available at the information point in the ENTRANCE AREA.

You can find where the access points to the various attractions is for people with Take Care Bracelets on the back in the overview.

Minimum requirements

Park area	Attraction	Number in the park map	Description	General minimum requirements				Good physical condition (1)											Access
